ARCHITECTURE - Programme Teaching Objectives

PTO	Teaching Objective
PTO1	Practice architecture by producing holistic, technically sound and creative design solutions to spatial problems at local, national and global scales, through a design-studio-centred professional identity.
PTO2	Apply sustainability and ecological sensitivity as core professional values in their design and construction decisions.
PTO3	Engage critically and creatively with architectural history, theory and cultural heritage, relating local and traditional architecture - particularly that of Cyprus - to global architectural discourse.
PTO4	Practice responsibly and ethically within the legal, regulatory and managerial frameworks governing the profession.
PTO5	Collaborate effectively within interdisciplinary and multicultural professional teams, reflecting the diverse, internationally-oriented learning environment in which they were educated.
PTO6	Pursue continuing professional development, postgraduate study and lifelong learning, remaining active contributors to the evolving architectural profession at local, regional and international levels.
PTO7	Contribute to research, innovation and knowledge production in architecture and related design fields, whether through practice-based inquiry or academic research.
