Course Objectives	This course aims to provide students with a comprehensive knowledge and understanding of the historical development of design and art across Western and Eastern cultures, spanning from prehistoric art forms through the civilizations of Mesopotamia, Egypt, the Aegean, Greece, and Rome, to the foundations of Islamic art and architecture. Students will learn to identify key monuments and representative works within each period, analyze stylistic trends and distinguish the defining characteristics of typology, iconography, materials, and techniques that shape design and artistic production. The course further develops students' ability to interpret and contextualize works of design and art within their broader cultural, social, political, and historical frameworks, while critically evaluating and synthesizing major theoretical perspectives to inform deeper interpretation and understanding. Through this chronological and analytical approach, students will cultivate the critical and reflective thinking skills essential for engaging with design and art history as a foundation for their broader studies in architecture and interior architecture.	
Course Learning Outcomes	**Students will able to:**	**Teaching Methods** / **Evaluation Methods**
	1. **Describe and explain** the historical development of design	Weekly lectures / Mid-term & Final exams

	and art across the cultures and/or periods covered, identifying their key monuments and representative works.		
	2. **Analyze and distinguish** stylistic trends in design and art, defining their essential characteristics such as typology, iconography, materials, and techniques.	Weekly lectures	Mid-term & Final exams
	3. **Interpret and contextualize** works of design and art within their broader cultural, social, and historical frameworks, recognizing the roles of their creators and patrons.	Weekly lectures	Mid-term & Final exams
	4. **Critically evaluate and synthesize** theoretical perspectives related to design and art, assessing how these frameworks inform interpretation and understanding.	Weekly lectures	Mid-term & Final exams
Course Content	This course focuses on the history of design and art in Western and Eastern cultures, from the Mesopotamian civilization to the fall of the Roman Empire. It provides a chronological survey of architecture, interior architecture, sculpture, painting, furniture, and the decorative arts, examining these disciplines within their cultural, political, religious, socio-economic, and technological contexts. The course develops a solid understanding of key monuments and significant works of art. It also equips students with the analytical skills to identify stylistic trends in the design and art of the covered cultures and periods, and to examine their defining characteristics, including typology, iconography, materials, and techniques. Finally, the course introduces major theories of design and art, fostering students' critical and reflective thinking. Assessment consists of weekly lectures, two projects, a midterm examination, and a final examination.

CONTRIBUTION OF COURSE LEARNING OUTCOMES TO PROGRAMME LEARNING OUTCOMES

No	**PROGRAMME LEARNING OUTCOMES**	Level of Contribution (1-lowest/ 5- highest)				
		1	2	3	4	5
1	Understand architectural history, theory, and cultural heritage, including the relationship between local/vernacular traditions and global architectural discourse.					X
2	Understand the technical knowledge and the principles of structural systems, building technology, environmental performance, and construction processes as integrated components of architectural design.		X			
3	Comprehend sustainability, ecological sensitivity, and climate-responsive design principles and their application across different scales of the built environment.	X				
4	Recognize the legal, ethical, and professional frameworks governing architectural practice, including relevant codes, standards, universal ethical values, and the principles of project management and cost estimation.	X				
5	Apply creative and critical design thinking to develop holistic architectural solutions that respond to spatial, environmental, cultural, and social challenges at local, national, and global scales.	X				
6	Produce professional drawings, models, technical documentation, and digital/parametric visualizations that effectively communicate architectural proposals at all stages of design.	X				

7	Conduct systematic, evidence-based research and apply critical evaluation methods to inform and validate design decisions throughout the design process.				X	
8	Integrate interdisciplinary knowledge — spanning art, engineering, ecology, and social sciences — to produce innovative and contextually sensitive design outcomes.				X	
9	Demonstrate professional and ethical responsibility, with sensitivity to environmental sustainability, socio-cultural diversity, and the well-being of communities served by architectural practice.			X		
10	Collaborate effectively in interdisciplinary and intercultural teams, demonstrating leadership, communication, and project management competencies in design and professional contexts.		X			
11	Communicate architectural ideas persuasively and clearly in verbal, visual, and written form to professional, academic, client, and public audiences.			X		
12	Engage in continuous self-reflection, lifelong learning, and active contribution to the evolving architectural profession at local, regional, and international levels.			X

ASSESSMENT DETAILS AND EVALUATION CRITERIA:	
Final grades will be determined based on the course learning activities and the assessment details for the final examination or project, as outlined below, in accordance with the University's Education and Examination Regulations. Students are required to attend at least 70% of the classes. The maximum allowable absenteeism is 30%. **The mid-term exam (20%), two projects (40%), and final exam (40%) marks will be combined to determine the** overall assessment mark for this course.
