Language of Instruction	English

Course Instructor(s)	Asst. Prof. Saloumeh Khayyat Kahouei	E-mail: khayyat.kahouei@arucad.edu.tr Office: Eternal Spring Office 3
Course Objectives	Aim is, to receive professional life and related equipment to the product designer canditates from the business world and in different areas of design professionals, industry executives in different fields of study, the researchers within the framework of the program.	
Course Learning Outcomes	**Students To Do:** **Teaching Methods** **Evaluation Methods** Students will critically debate contemporary discourses in design and identify emerging challenges throughout their design education from the first semester onward. Lectures, interactive discussions, critical debates, contemporary design case studies, and reflective learning activities. Class Participation, Critical Reflection, Presentation.	

	Students will connect making to thinking by integrating design theory, technology, and practical applications through design thinking and problem-solving processes. Studio-based learning, hands-on making, design thinking exercises, problem-based learning, and guided design development. Studio Practice, Design Project, Final Project.
Course Content	The colloquium aims to expose students to issues of design outside the classroom and provide exposure of different design thinking both among their classmates in their departments and other students in the faculty of design.

CONTRIBUTION OF COURSE LEARNING OUTCOMES TO PROGRAMME LEARNING OUTCOMES							
No	**PROGRAMME LEARNING OUTCOMES**	Level of Contribution (1- lowest/ 5- highest)				
		1	2	3	4	5
1	Understand knowledge of industrial design principles, design methodologies, history, aesthetics, form & function and product development processes.					x
2	Explain the properties of materials, manufacturing technologies, and production methods used in industrial product design					x
3	Understand ergonomics, and user-centered design concepts in product development				x	
4	Understand sustainability principles, environmental impacts, and life-cycle considerations in industrial design				x	
5	Analyze design problems, user needs, and market requirements to develop appropriate product design solutions.					x
6	Generate creative product concepts using sketching, ideation techniques, and visual exploration methods.				x	
7	Develop product designs using digital tools, 3D modeling, and rendering software					x
8	Develop prototypes or models to evaluate product functionality, usability, and aesthetics.				x	

9	Communicate design ideas effectively through sketches, technical drawings, models, and professional presentations.				x	
10	Work effectively in multidisciplinary teams during product design and development processes.				x	
11	Manage design projects considering production constraints, market needs, and economic feasibility.					x
12	Demonstrate professional responsibility, ethical awareness, and commitment to sustainable design practices.				x
