Language of Instruction	English					
Course Instructor(s)	Vic Grout  E-mail: vic.grout@arucad.edu.tr Office: TIOFF18					
Course Objectives	This course is intended to int Emerging Technology and it the postgraduate Futurology for second year students. O midterm will be decided at possible. The course will ic and in both broad and specific futures. The emphasis throug different viewpoints of its de	s motivation a course at a levelone, possibly midterm in or lentify key teed to detail, and reghout will be or	nd impact. It covers yel of discussion and two of the case studider to keep the mate thnology drivers, both late these to human expression critical analysis of least two two controls.	selected elements of analysys appropriate es planned for after rial as up to date as a current and future, sperience and human		
<b>Course Learning Outcomes</b>	Students will able to:		Teaching Methods	Evaluation Methods		
	1. Gain a broad general knowledge of some current research areas in technology and their application in industry, commerce and further afield.  Lecture notes and reading material  Midterm exam					
	2. Develop a critical awareness of the impact of current and emerging research and development.  Lecture notes and class Midterm exam discussion/debate					

**COURSE SYLLABUS** 

and social issues in computing,	class	Final academic report/paper
basis of, potentially conflicting,	class	Final academic report/paper

The purpose of this module is to provide students with a thorough and up-to-date knowledge of current trends in computing, engineering, science and wider technology. By definition the syllabus will be reviewed regularly but the focus for students will always be how to identify and critically analyse current issues in technology and be able to put developed arguments supporting and refuting issues, otherwise known as 'Futurism' or 'Futurology'. The syllabus will naturally be reviewed on a regular (probably twice-yearly) basis with redundant material being discarded and new introduced in its place. Typical content, based on current directions, could include:

- The 'Internet of Things'
- Big Data Analytics
- The 'ESPELETIA' model for technological impact
- Technology and the Environment/Green IT and environmental science
- Optical, Quantum and Biological Computing
- Parallel and Grid Computing
- Artificial Intelligence and Artificial General Intelligence
- Evolving High-Speed Communications
- Robotics and Automation
- Models of Intelligence
- Privacy, Security and Threats
- Health and safety
- Computing in the developing world
- Philosophical principles/Computational philosophy
- Radio Frequency Identification (RFID) and similar technologies
- The Technological Singularity (and other 'singularities')
- Social Media and its Impact
- The perils of 'techno-capitalism' and developing technology for profit

COURSE OUTLINE/SCHEDULE								
Week	Topic	Implementatio n (theory/practi ce)	Required Reading, Preliminary preparation					
1	Introduction and overview of module. What's <i>your</i> vision of the future? (Do <i>you</i> need to do anything to help/make it happen? Why futurism/futurology is <i>hard</i> !	Т	Class notes. "Turing's Radiator" ('Difficult Problems in Futurism) http://vicgrout.net					

#### **Course Content**

	1		T 7
			Class notes.
2	The 'Big Technology Drivers': Working alone and together	T	Hoffman, S.S., The Five Forces That Change Everything: How Technology is Shaping Our Future
			Weinersmith, K. and Weinersmith, Z., Soonish: Ten Emerging Technologies That Will Improve and/or Ruin Everything
			Class notes.
3	The 'ESPELETIA' model for looking at the 'bigger picture'	Т	'A New Futurism Tool: ESPELETIA' https://vicgrout.net/2024/01/02/a-new-futurism-tool-espeletia/
			Class notes.
	Artificial Intelligence and Artificial		Hoffman, S.S., The Five Forces That Change Everything: How Technology is Shaping Our Future
4	General Intelligence. The 'Technological Singularity' Part 1.	Т	Weinersmith, K. and Weinersmith, Z., Soonish: Ten Emerging Technologies That Will Improve and/or Ruin Everything
			Grout, Vic, 'The Singularity Isn't Simple' https://www.mdpi.com/2078-2489/9/4/99
			Class notes.
5	The 'Internet of Things' and Big Data Analytics	T	Hoffman, S.S., The Five Forces That Change Everything: How Technology is Shaping Our Future
	Data Marytres		Weinersmith, K. and Weinersmith, Z., Soonish: Ten Emerging Technologies That Will Improve and/or Ruin Everything
			Class notes.
6	Robotics, Automation and High- Speed global communications	Т	Hoffman, S.S., The Five Forces That Change Everything: How Technology is Shaping Our Future
	speed groom communications		Weinersmith, K. and Weinersmith, Z., Soonish: Ten Emerging Technologies That Will Improve and/or Ruin Everything
			Class notes.
7	The 'Futurology Grid': Theory and practice.		'The Futurology Grid' https://vicgrout.net/2024/01/04/the-futurology- grid/
8	MIDTERM	Т	Exam (40 Points)
			Class notes.
9	Case Study 1: Techno-capitalism: the new future or the end of everything?	Т	'Fully-Automated Luxury Dancing' https://vicgrout.net/2020/09/16/fully-automated- luxury-dancing-a-futuristic-conspiracy-theory/
	1		

**COURSE SYLLABUS** 

10	Case Study 2: Models of 'Intelligence'. Is real machine intelligence possible?	Т	Class notes.  Grout, Vic, 'The Singularity Isn't Simple' https://www.mdpi.com/2078-2489/9/4/99
11	Case Study 3: New computing models: quantum, optical and biological computing	Т	Class notes.
12	Case Study 4: Final topic to be discussed before midterm and selected in line with newest developments	Т	Class notes.
13	Case Study 5: Final topic to be discussed before midterm and selected in line with newest developments	T	Class notes.
14	Student Presentations	T	Class notes
			Class notes.
15	The 'Technological Singularity' Part 2 and the 'Environmental Singularity'. Will technology save us	Т	Hoffman, S.S., The Five Forces That Change Everything: How Technology is Shaping Our Future
	'in time'?		Weinersmith, K. and Weinersmith, Z., Soonish: Ten Emerging Technologies That Will Improve and/or Ruin Everything
			Class notes.
16	Philosophy of Technology and Technology Ethics	Т	"Turing's Radiator" ('Difficult Problems in Futurism) http://vicgrout.net
17	FINAL		Academic Paper Submission (60 points)

	CONTRIBUTION OF COURSE LEARNING OUTCOMES TO PROGRAMME LEARNING OUTCOMES					
	PROGRAMME LEARNING OUTCOMES	Co (1	onti	l of ribu wes st)	tio	
		1	2	3	4	5
1	Knows the historical development of the field of communication, basic concepts, theories and research methods.		X			

		1		,		
2	Knows the principles and elements of basic design.	X				
3	Knows the history, theories and theorists of visual communication.		X			
4	Knows advanced practical skills in various commercial and creative contexts, including graphic and audiovisual multimedia design.	X				
5	Knows national and international ethical rules, standards and legal documents on communication and visual communication design.			X		
6	Able to use the tools, methods and techniques and computer software required for visual communication design applications.	X				
7	Able to produce innovative and original works that reflect abstract and concrete concepts by emphasizing creativity	X				V
8	Has the knowledge and skills to transform creative and innovative ideas into graphic, photographic, typographic, illustrative, 2 and 3-dimensional, animated and interactive visual expressions.	X				
9	Applies visual communication design techniques with design technologies in developing and changing media environments.	X				
10	Has the competence to create visuals with designs that emphasize aesthetics in design processes.	X				
11	Has the competence to define the problem, solve the problem, plan, manage the project and present in the design-based project development process.	X				
12	Has the ability to use research methods and techniques in the field of Visual Communication.				X	
13	Has the competence to research, plan, implement and report during the project phase.			X		4
14	Has the competence to establish the connection between design and aesthetic values.		X		4	
15	Has the competence to interpret universal visual culture and associate the ties of symbols with universal visual culture.			X		
16	Has the competence to analyze, understand and interpret projects in the field of visual communication design with a critical and independent approach.			X		
17	Knows how to integrate and use digital technologies and artificial intelligence based/supported design tools creatively and innovatively in visual communication design and production stages.				X	
18	Knows how to integrate and use digital technologies and artificial intelligence-based/ supported design tools creatively and innovatively in visual communication design and production stages.				X	
19	Evaluates artificial intelligence applications in design studies with a critical approach in terms of aesthetics and originality, and uses them in accordance with ethical rules.					X

#### ETHICAL RULES WITH REGARD TO THE COURSE

Detected and undetected plagiarism is a serious offence at any time and it could have devastating effects on your degree result and future professional lives. However, plagiarism is easy to avoid if you make sure you identify and acknowledge your sources thoroughly and do not copy directly from visual examples, designs, or notes that have in turn been taken word for word from your sources. The maximum similarity level is 20% in written assignments.

Important Note on Attendance: You must attend at least 70% of the sessions for this course or you will automatically fail. Students cannot be absent more than 30% of the time, *even if you have medical reports* or other forms of justification. Lecturers have no control over this rule: it will be rigorously applied by the system.

You will also be required to submit a statement on your use (if any) of generative AI when submitting assignment work.

#### ASSESSMENT DETAILS AND EVALUATION CRITERIA:

**COURSE SYLLABUS** 

Final Grades will be determined according to the Course Learning Activities and Final Examination/Project/Dissertation Assessment Details as below, and comply with the Education and Examination Regulation set forth by the University.

You will be assessed through a combination of (midterm) formal, timed exam (40%) and (final) assignment report (60%).

The (midterm) formal, timed exam (worth 40% of the overall course grade) will test basic understanding of key concepts and their application in simple scenarios. The (final) assignment report (worth 60% of the overall course grade) will allow you to consider specific combinations of technologies and project them, and their wider impact, into the future
